Rubber protection for car lashings to webbing 50mm

Product information

The rubber protection for car lashings to 50 mm webbing is a durable accessory used when securing vehicles on trailers and recovery trucks. It prevents the webbing from touching the tyre, which is crucial for safe vehicle transport in accordance with VDI 2700 parts 8.1 and 8.2.

Made from high-quality rubber with reinforced textile layers, it offers excellent abrasion resistance, stability, and long-lasting performance. This protective element ensures correct strap positioning, reduces wear, and extends the service life of the entire lashing system. Ideal for professional vehicle transporters, trailers, and automotive logistics.
