The Original Roundsling Extreema® with HMPE core

Produktinformation

The Original Extreema® roundsling with HMPE core is a high-strength lifting sling developed for heavy lifting operations where low weight and durability are required. The parallel-laid HMPE fiber core ensures consistent load distribution and reliable performance. Combined with a cut-resistant HMPE sleeve, it is suited for demanding environments with increased risk of abrasion and damage.

Its core is made of general HMPE (Trosar®), which makes it up to 15 times stronger than steel on a weight-to-weight basis.

The sleeve is white HMPE Extreema® L-series sleeve. With exceptional performance against cuts, abrasions, and punctures. The white sleeve is repairable.

WLL range: 3t – 600t
EWL range: 0,5m – 65m

When to choose this product

Best for:

- Heavy lifting requiring high strength with minimal sling weight
- Environments with abrasion, cutting risk, or chemical exposure

Product benefits:

- HMPE parallel-laid core provides high strength with low weight
- Cut-resistant HMPE sleeve protects against abrasion and punctures
- Does not absorb water and floats, suitable for marine use
- Chemical-resistant material supports use in harsh environments
- Repairable sleeve extends service life and reduces downtime
- RFID improve inspection and traceability
