

Flexible 3 Way Barrier GEMINI

Produktinformation

Gemini is a robust and reinforced flexible barrier from the HARD-FLEX® series, designed to effectively protect pedestrian routes in production halls and warehouses. Thanks to its design, consisting of two flexible vertical beams connected by three parallel crossbars, the barrier provides a reliable separation of pedestrian areas from industrial machinery and vehicle traffic. The Gemini barrier is easy to install - it can be installed using system joints or anchored to the floor using heavy-duty concrete screws. It's a solution that is ideal for high-traffic areas, ensuring maximum safety for users.

Artikel-Nr.	Abmessungen (mm)	A mm	Lieferzeit (in Tagen)
53010064B	1200x1000	1.000	12
53010063B	1200x1500	1.500	12
