Loading Ramp RRK

Produktinformation

This aluminium ramp is designed for easy one man operation. The folding and unfolding of the ramp is made almost effortless by the use of gas struts to balance the weight of the ramp.

The ramp surface is fabricated from extruded aluminium profiles which are perforated and embossed to give a perfect anti-slip surface. This also allows rain and snow to disperse very easily. The light weight of the ramp allows most of the pay load of the vehicle to be retained.

The RRK is held in the vertical position by two latches, mounting blocks are used to keep the assembly rigid and prevent any vibration during transport.

Other advantages:

- Virtually maintenance free
- Fitted with 30 mm high safety curbs along both edges.
- Robust hinges (guaranteed for life).
