

Loading Ramp AVS

Produktinformation

These loading ramp have been specially developed for loading heavy construction machinery with steel chains, forklifts and work platforms. The running surface consists of a closed, non-slip aluminum profile.

The ramps are available in the following versions: with support tongue, hook-in, with pipe connection for a 60 mm shaft, foldable in the middle with support foot, or in two parts with separate foot.

A spring lifting mechanism is available for the permanently attached loading rails, which greatly reduces the force required for lifting and lowering.

Artikel-Nr.	Code	Load Capacity (kg)	Länge mm	Width mm	Höhe mm	Gewicht (kg)	Lieferzeit (in Tagen)
35130017F	AVS 150	5.300	3.685	520	1.090	60	12
35130025F	AVS 170	4.960	4.685	540	1.390	80	12
