

Tip pillar left 4000XF 400mm

Produktinformation

The Armaton 4000 XF tip pillar left with a height of 400 mm is a specialized component of the platform pillar system, designed for maximum functionality in tipper body applications. Mounted on the edge of the side rave, it provides a smooth inner surface that prevents goods from getting stuck during unloading.

The pillar features three mechanisms - two acting as hinges and one for locking the dropside - ensuring a compact, ergonomic, and weight-optimized solution. [... Read more](#)
