Decklashing Superlash 99™

Product information

Superlash 99™ is a unique lashing system for timber deck cargo. It is easy and efficient to use and gives a very high pretension. The lashing time is short and to release the pretension takes only a second.
For a complete deck lashing solution we recommend the usage of our ratchet handle and extra tightener. Lashing straps on both sides of the deck cargo secure the load on the ship.

Superlash 99™ meets the requirements in the TDC-code of 2011.

Customized system for your ship
We can customize Superlash 99™ to your specifications. All we need are the following dimensions (see illustration):
A. Distance from deck fitting to top of hatch cover
B. Max height of load
C. Width of hatch cover
