

## Absortest™

### Product information

#### Container Conditions Monitoring Service

With Absortest technology, take full control over the safety and quality of your goods during transport. The system provides real-time monitoring of conditions regardless of the transport mode—road, rail, sea, or air.

#### Key Features:

- Four-function sensor kit:  
Monitors temperature, humidity, door openings, and shocks.
- Advanced mobile connectivity:  
Data transmission via 4G/5G LTE networks with 2G backup ensures stable connectivity in all conditions.
- Ease of use:  
Built-in LCD screen allows quick checks of device activation, connectivity, battery level, and current temperature.
- Long battery life:  
120 days of uninterrupted operation thanks to an efficient lithium-ion battery.
- Durability and resilience:  
Waterproof housing (IP64) protects the device from water and dust.
- Detailed reporting and data analysis:  
Data can be downloaded via USB or in PDF format.

#### Advantages of the Absortest System:

- Transport optimization:  
Accurate data on container conditions enables a swift response to any irregularities.
- Full control over cargo:  
Remote real-time monitoring capability.
- Support for transport validation:  
Tests and analyses help improve the protection of goods from humidity and other harmful factors.
