

Flexible 3 Way Barrier GEMINI

Product information

Gemini is a robust and reinforced flexible barrier from the HARD-FLEX® series, designed to effectively protect pedestrian routes in production halls and warehouses. Thanks to its design, consisting of two flexible vertical beams connected by three parallel crossbars, the barrier provides a reliable separation of pedestrian areas from industrial machinery and vehicle traffic.

The Gemini barrier is easy to install - it can be installed using system joints or anchored to the floor using heavy-duty concrete screws. It's a solution that is ideal for high-traffic areas, ensuring maximum safety for users.

Material: Hard-Flexx® polymeric

| Part code | Dimensions mm | A mm | Delivery time |
|-----------|------------------|-------|---------------|
| 53010064B | 1200x1000 | 1,000 | 12 |
| 53010063B | 1200x1500 | 1,500 | 12 |
| 53010062B | 1200x2000 | 2,000 | 12 |
