

Wall Panel Lifting Gear

Product information

The galvanized wall panel lifting gear is used for the laying of horizontally positioned AAC wall panels. The profiled clamps ensure a high grip. If the safety chain is applied a transport high above the ground is permitted. The safety chain can be released by a tension rope of 10 m length.

Features:

- Used for the laying of horizontally positioned AAC wall panels
- Profiled clamps ensure a high grip
- If the safety chain is applied a transport high above the ground is permitted
- The safety chain can be released by a tension rope of 10 m length
- Carrying capacities 675 kg, 1,000 kg and 1,400 kg available
