

Double decking system XTRA-DECK ATD-2 & ATD-F - standard set

Product information

The ATD-2 and ATD-F systems are designed to be built into the wall of the vehicle. The rails built into the wall optimise the useful width of the van. The system complies with European Directive 93/94 EU. - ATD-2 : the rails are recessed in the wall. There is no risk of the pallets catching on the rails. - ATD-F : rails are partly recessed in the wall. The risk of the pallets catching on the rails is greatly reduced. Below you may see configuration of standard setting.

Material: Aluminium

Marking: Piek

Part code	Model	Description	Packing Qty.	Delivery time
32020009F	ATD-2	Double decking single track ATD-2 1960mm	2	12
