Double decking system XTRA-DECK DPA - standard set

Product information

The DPA system , like the ATD system, allows the load capacity of the van to be doubled by adding a second level by means of beams. The height of the double deck is adjustable. The beams slide into rails fixed to the walls of the van. DPA system : for fixing on the wall. The rails are fixed directly to the walls without modification. Below you may see configuration of standard setting. ... *Read more*

Material: Aluminium
Marking: Piek
