Sliding thermo walls

Product information

Sliding partition specially designed for distribution of food and other temperature-sensitive goods. Opening and closing of the wall takes place quickly making that temperatures can be kept as accurate as possible. The sliding wall is made in two halves with substantial overlap allowing cold drafts are eliminated. The two sections are suspended from a ceiling rail by track, making it possible to open both the right and left side. The sliding partition comes complete with roof rail and holder for cargo bar. The isolation material have Thermal Conductivity value 0,042W/mK. Made to order according to specification.
