

Shoring bar adjustable steel

Product information

The load locking bar is designed for effective blocking and securing of cargo on transport surfaces. Its construction consists of two sliding sections, allowing easy length adjustment and convenient storage – when not in use, it can be quickly folded and stored in a vehicle compartment.

Equipped with rubber end pads that increase friction, improve load stability, and protect surfaces from damage. They also help reduce noise during transport.

The bar can be mounted on the rear door or vehicle frame, making it a versatile solution for various transport applications.
