

## Open-Flange Seals, Signode

### Product information

Signode 117 HDG OF Open-Flange seals are specifically designed for use with a N-1444-5LSH pneumatic sealer on 32mm Magnus steel strapping. Open-Flange seals are the heavy duty version of Snap-On seals. These seals are placed over the overlapping strap ends either before or after tensioning the strapping, eliminating pre-threading and increase productivity.

**Seal Type:** Open Flange  
**Joint Type:** Double Crimp

**Material:** Steel  
**Marking:** Logo of supplier
