Universal rear pillar 4000XF 400mm

Product information

The Armaton 4000 XF universal rear pillar with a height of 400 mm is a versatile component of the platform pillar system, designed for flexible use in various types of commercial vehicle bodies. Its universal design allows broad application and easy integration with other Armaton 4000 XF system components.

Thanks to its optimized weight, the pillar enables maximum use of the vehicle's payload while maintaining high strength and structural stability. Ergonomic features ensure ease of use and efficient operation in daily tasks.

Made of anodized aluminum and high-quality components, it guarantees durability, resistance to heavy-duty use, and virtually maintenance-free operation
