

Inferno® Soft Sling

Product information

Inferno®: The Heat Resistant Soft Sling

The ultra-heat resistant Inferno® soft sling makes it possible to lift heavy payloads when working under extreme heat conditions. Even when the temperature rises to 200°C, the Inferno® soft sling will maintain strength!

Properties:

The Inferno® soft sling is made of 100% Aramid and available from 0,5m to 20m, with a WLL up to 50t. The Inferno® has a vibrant yellow color and can be manufactured in the black color for WLL up to a maximum of 10 tons.

Features:

- Maintains its strength up to 200°C(!)
- Easy to position
- Low D:d ratio
- Soft, lightweight, and easy to handle
- Improves workflow
- High abrasion resistance
- Environmentally friendly due to the long lifespan
- Creates safer lifting conditions

Sustainability:

The Inferno® heat-resistant soft sling jacket is repairable, making it a sustainable option. In case of damage to the jacket, it can be repaired, extending the lifespan of the sling and reducing waste.

Marking: According to standard, CE-marked, UKCA-marked

Standard: EN 1492-2
