

Corner protector KPSS

Product information

The safety angle ensures even distribution of securing forces when fastened with a 100 mm wide belt. The protective corner has a smooth outer surface, which reduces wear and extends the life of the belts stabilizing the load. The edge protector has additional limiters and a belt guide.

Features:

- withstands hundreds of kilograms of pressure in various planes
- protects the edges of the load from damage, starting from the smallest packages
- made of a special type of plastic tested in various weather conditions
- adapts to various shapes of load (flat and round)
- has a European Union Certificate for industrial designs
- protected by a patent
- limiters prevent lateral slipping of the belts
