Multi-Stick

Product information

Forankra
Secures everything in transit™

Multi-stick is a multifunctional tool for drivers that, thanks to its design, further protects the process of securing a load from potential accidents.

Its innovation lies in the fact that it offers four functions in one tool, while providing safety and ergonomics for the driver from the ground level.

Set:

1. **SECU-STICK function: The SECU-STICK head allows** the side panels to be removed and installed **in complete safety**, controlling their descent to prevent the driver from dropping it on him.
2. **STRAP-GO function:** This function allows **lashing straps of 50mm width** and different lengths to be launched with **a simple push of the wrist**
3. **CORNER-STICK function:** Allows you to **position protective angles** from **1m20 to 2m40** on the load **while remaining on the ground.**
4. **Telescopic handle: Adjustable from 1m to 2m50**, the telescopic handle is equipped with onesie closures. It is very easy to change the different bits depending on the desired function.
5. **Hanger**: To secure the kit in a handy place so that it does not get in the way when it is not needed.
6. **CLEAN-STICK function:** The CLEAN-STICK function is an innovative tool designed to effectively and safely **clean windshields** from the ground.

7. MEASURING-STICK function: This laser device allows **the height of a vehicle or load to be accurately measured** from the ground. Results are instantly displayed on the screen, ensuring reliable and fast measurements.
