Edge Cap 4000XF 400mm

Product information

A component mounted on the dropside, designed to close the side profile and enable proper top-opening functionality. The U-profile acts as both a finishing and protective element, improving durability and overall appearance of the body. Made from durable material, resistant to weather conditions and heavy-duty transport use. Designed for dropsides with a height of 400 mm, compatible with systems used in transport bodies and tipper trucks.
