Concrete lifting eye clutch

Інформація про товар

A universal concrete lifting eye clutch used for lifting and handling concrete elements containing separate lifting anchors. The lower part of the round main body of the lifting clamp has a pocket that fits into the correspondingly shaped end of the T-lifting anchor in the semicircular recess of the concrete element. Connecting and disconnecting is quick and easy and can be done in practically one movement. The lifting clutchs are suitable for use in axial (vertical)/diagonal and lateral 90° load directions.

Load groups:

- **NS8BEL1,3:** 1,0-1,3 t
- **NS8BEL2,5**: 1,5-2,5 t
- **NS8BEL5**: 3-5 t
- **NS8BEL10**: 6-10 t
